LOWISA 56 Sustainability Report
July 30 – Aug 6th 2022
By Elizabeth Harries
Lake of the Woods International Sailing Association (LOWISA) has successfully completed another year of the annual LOWISA regatta on Lake of the Woods, Ontario Canada. This year 35 racing boats and a small fleet of cruisers came to race, play, and explore the majestic Lake of the Woods for 7 days and nights. On LOWISA each boat is responsible for provisioning everything from food and water to sunscreen for the week while LOWISA provides two dinners at the Layover Day lodge, dinner at the awards ceremony, onshore mid-week social activities, and kids events. After achieving Gold Certification with Sailors for the Sea in LOWISA 55, the organization was ready to raise the bar for LOWISA 56 (L56) and strive for Platinum Certification. Below you will find descriptions of the L56 best efforts for each of the Clean Regatta categories.

1. Elimination of Single-Use Water Bottles and Provide Water Refill Stations
LOWISA does not provide single use water bottles to any participants at any time. Boats and crews are encouraged to provision utilizing more sustainable means of hydration which is communicated in pre-event newsletters, e-mails, as well as on the website. Partnered with Northern Harbour, 5 gal refillable jugs are available for purchase and accepted for trade-ins/refills once emptied. In coordination with the mid-week lodge, refills were available mid-week for any reusable water jugs. Some participants have gone so far as to use direct filtration methods, either portable units similar to those for camping or permanent systems installed onboard, both taking water directly from the lake into their water bottles. Adopting reusable water bottles is also one of the criteria for the LOWISA Sustainability Award. This year every boat who was judged in the Sustainability Award achieved points in this category.

Volvo Judging Criteria

Resources for Participants

LOWISA Sustainability Guidelines here.
2. **Eliminate Plastic Straws**

No straws of any kind were provided at LOWISA. Each LOWISA hosted event was also a BYO reusable cup event. No plastic or straws of any kind were provided. Just the drinks and ice. We also collaborated with the mid-week lodge to withhold any straws.

3. **Serve Food with Plastic-Free Dinnerware**

Layover Day lodge meals were provided on traditional dinnerware, while the Commodores Ball and Awards Ceremony was a BYO plate and cutlery event with backup compostable plates for the forgetful.
4. Use or Provide Reusable Bags

The LOWISA 56 registration package came in a reusable NORWEX tote bag generously donated by NORWEX Winnipeg (seen below being shuttled back to the boat via paddleboard). Additionally, all our awards requiring bags were provided in reusable totes or with no bag at all.

![Image of reusable bag](image1.jpg)

5. Award Practical Items or Use a Perpetual or Upcycled Trophy

LOWISA was very fortunate this year to have such amazing sponsors who provided generous items for our competition winners. Practical items such as hats, backpacks, burgees, a SodaStream, wine, mugs, a golf umbrella, t-shirts, and zero waste produce bags were some of the amazing prizes.

This year’s awards consisted of the LOWISA legacy trophies as well as take home awards locally made from sustainable wood (sailboat trophies). Take home trophies were awarded to each of the 1st, 2nd, and 3rd place winners in each division.

New to LOWISA 56 was our Sustainability Award. Our generous sponsor Volvo Winnipeg (@volvocarswinnipeg) championed our sustainability efforts by donating a brand-new North Sails sail as the grand prize!

![Image of awards](image2.jpg)
6. Publicize Your Sustainability Efforts

LOWISA has been very active publicizing sustainability through social media, newsletters, the website, as well as during the event. Please check our Instagram and Facebook pages @LowisaRegatta to catch some of our sustainability tips. You can sign up for our newsletter and learn all about our sustainability efforts on our website at www.lowisa.org.

During the event daily announcements were made regarding sustainability programming, such as reminding folks to BYO cups and plates to events. During each event the “leave no trace” and “LOWISA sustainability” signs were posted publicizing LOWISA’s sustainability values and goals.

The Green Team spent over 30 hours going aboard each boat to judge crews for the Sustainability Award. The Green Team had amazing dialogues with each crew, discussing the importance of sustainability, highlighting each crew’s efforts, sharing best practices, and discussing the issues specific to LOWISA.
7. Involve Local Organizations
This year LOWISA partnered with Lake of the Woods District Stewardship Association (LOWDSA) to promote their environmental stewardship programs and to educate participants on aquatic invasive species (AIS). LOWDSA set up an AIS decontamination station during our boat launch day as well as an info booth during registration and check-in hours. LOWDSA also developed an AIS info booklet for LOWISA that was provided via e-mail to all registrants and is available on the website. Throughout the week LOWISA collected cans from our events and participants and donated them all to LOWDSA at the end of the week.
8. Post Educational and Reusable Signage
At each event the reusable (laminated) LOWISA sustainability signage was displayed. The signage includes LOWISA’s sustainability initiatives with a QR code to the sustainability page on our website, the ethos of “Leave No Trace”, as well as garbage, recycling, and beer can signs to properly separate and collect waste.

9. Serve Local Food or Source Seafood Sustainably
LOWISA organizes dinners during our Layover Day at a lodge and at the end of the event at the Awards Ceremony & Commodores Ball. The lodge provided an exquisite fish fry supplied by local fisherman, while a local pizzeria provided dinner for the Commodores Ball.

10. Organize a Green Team
LOWISA Green team had 10 people for L56 representing the spirit of sustainability and executing the sustainable objectives throughout the week. Green Team members were given bright green T-shirts to wear during the event to raise awareness, promote sustainability, answer questions, and contribute to the sustainability programming. Team members toured the fleet by paddleboard for the Sustainability Award assessments. In a show and tell fashion each boat/crew displayed their practices related to the judging criteria. Over 30 hours of on-board inspections took place with
fruitful discussions covering sustainable options, the importance of taking action, and the future of the lake. Some of the best moments were awakening folks to the fact that they already are very sustainable!

11. Ensure Proper Waste Bin Placement and Signage
LOWISA starts and finishes the week at Northern Harbour which has robust garbage and recycling facilities. Throughout the week the Green Team set up Garbage, Recycling and Beer & Drink Can ‘bins’ at each LOWISA event and at the Layover Day lodge. LOWISA also coordinated a mid-week pump-out barge to service the fleet, which also collected and properly disposed of waste. At Northern Harbour where LOWISA starts and finishes the week, folks were able to dispose of waste and separate all recyclables and hazardous materials. LOWISA and Northern Harbour donated all cans and bottles to LOWDSA to support their environmental stewardship programming.
12. Divert Food Waste from the Landfill
LOWISA offers mid-week lodge dinners as well as a dinner at the Commodore’s Ball & Awards Ceremony at the end of the week. In efforts to reduce food waste LOWISA sold meal tickets in advance to coordinate accurate amounts of food for each dinner and thus reduce the chances of any food waste. Dinners were included and counted through the event wristbands and sold separately. Further, folks were encouraged to plan and provision in advance as to not over or panic shop which often results in excess waste. Participants were also given tips on how to store food to reduce food waste in the Sustainability Guidelines.

---

13. Use Paperless Event Management
All LOWISA communications are done electronically through e-mail newsletters, social media, and our website. Only necessary information and course maps were printed in the registration packages for safety reasons as many areas of the lake do not have cell service. All event information was available for download in pdf format from the website. Race results were distributed by Bluetooth and by race committee touring the fleet with printouts for folks to take pictures of and share. The LOWISA photo share was a QR code distributed using air drop, text message, and e-mail. For the Sustainability Award judging, the Green Team utilized their phones in offline google sheets.
14. Promote Alternative Transportation
LOWISA organized a carpool registration on groupcarpool.com for folks to coordinate rides to and from the event. The link was promoted in e-mail newsletters and through the Sustainability Guidelines provided on our website. During the event Anchor Massage coordinated additional shuttle rides to and from the lodge to reduce the overall carbon footprint.

15. Increase Awareness of Wildlife and Habitat Protection
Lake of the Woods District Stewardship Association (LOWDSA) set up an info booth during our boat launching and registration times to educate the fleet on our local aquatic environment including wildlife and habitat protection. The biggest threat to Lake of the Woods is aquatic invasive species. LOWDSA also provided a LOWISA specific “dock kit” which is a boater guide to aquatic invasive species and is available on our website.
16. Offer Vegetarian or Vegan Alternatives
Every meal LOWISA provides offers vegetarian alternatives. During our pre-event registration we collect dietary information so that we can provide accurate amounts of vegetarian and vegan options both at the Layover Day lodge and at our Commodores Ball. For the Sustainability Award incorporating vegetarian/vegan meals was one of the categories under the judging criteria to promote vegetarian and vegan alternatives.

17. Use Eco-Smart Race Management Techniques
LOWISA racecourses utilize minimal buoy/marker sets. Race committee anchors one buoy and the Race Committee vessel with the engine shut off, for the start and finish lines each day. LOWISA utilizes the natural features and islands of the lake for race features and marks. LOWISA opts not to have bow stickers for each boat, but utilizes the names of the boats for results. As well this year we opted to have a reusable burgee with reusable zip ties for boats to show their participation with the racing fleet.
18. Prevent Toxins from Entering the Water

LOWISA provided all registrants with the Sustainability Guidelines as well as the Sailors for the Sea Green Boating Guidelines which both encourage ‘water only washdowns’ and the use of lake friendly products. On the Keep our Waters Clean infographic LOWISA shares information on how to choose proper sunscreens, body products, and cleaning supplies. The Green Team also promoted toxic free products by encouraging DIY solutions and shared a DIY (chemical free) after sun recipe on social media.

The Sustainability Award encouraged participants to uptake practices that preserve water quality by offering such amazing prizes like a brand-new North Sails custom sail.

Participants were also provided Dr.Bronner’s pure castile soap in their registration packages thanks to our generous sponsor Tilly’s Pharmasave Kenora. This ensured each boat had a lake friendly soap on board.

To reduce the likelihood of fuel spills, LOWISA promotes fueling at Northern Harbour which has the proper spill kits and equipment to safely fuel vessels. Generally, there is not a requirement to fuel mid-week.

19. Encourage Green Boating Practices

Pre-LOWISA our sustainability guidance package was sent to all participants; it covers topics from how to sustainability provision, to how to be most sustainable whilst on the lake. The Sailors for the Sea Green Boating Guide, and the Lake of the Woods District Stewardship Association Aquatic Invasive Species ‘dock kit’ and LOWISA’s Sustainability Guidelines (which includes 12 Ways to Reduce Plastic, Sustainability Tips, Clean Cruising Guidelines, and Keep our Waters Clean infographics) were provided to all participants through e-mail as well as being publicly available on the website.

LOWISA offered a webinar Q&A via zoom on how participants could incorporate green boating practices into their race week and to answer any questions participants had.
During LOWISA our Race Committee anchors with their engines turned off at both the start and finish lines to reduce emissions, as well, our courses are designed so that the anchorage is not too far away from the finish lines.

Our Green Team was present throughout the week with their highly visible shirts at each event, placing signage, and having meaningful conversations with the fleet. Our collaborations with our amazing sustainability sponsors this year had profound impacts in encouraging green boating practices, enticing participants to do their best in the chances of winning a brand-new North Sails sail as well as other amazing prizes! Big Thank Yous to all our sponsors!

20. Other

Once a staple on LOWISA, red solo cups are no longer to be found! In addition to eliminating plastic straws and single use water bottles, LOWISA has also eliminated single use plastic cups. All of the LOWISA hosted events have been ‘bring your own reusable cup’ for the second year running.

New to LOWISA 56 was the Sustainability Award. Thanks to @VolvoCarsWinnipeg and our other amazing sustainability partners, we were able to offer substantial prizes encouraging participation. A brand-new sail from North Sails was the grand prize, for everyone reaching the point requirement was entered into the raffle for the sail, while highest point scorers collected 1st, 2nd, and 3rd prizes. LOWISA had over 80% participation in the sustainability contest with one quarter of participants scoring over 95%.
A Huge Thank You to our LOWISA 56 Sustainability Partners:
